

Introducing Altus Vision™

in partnership with 

Vision plans made just for you.

One more reason to smile

Vision care is a critical component of a benefits package. Employees who have vision insurance included in their health benefits are nearly twice as satisfied — and more than twice as likely to stay with their employer.

Altus Dental has partnered with VSP® — a national leader in vision benefits — to offer Altus Vision™.

Well known for their best-in-class vision programs, VSP is the ideal complement to our dental offerings.

Altus works for you, making it easy with one-stop shopping, simple invoicing, a dedicated account team and the best customer service in the business.

Why Altus Vision?

Ease of administration

From quoting to enrollment and billing, we make it easy to pair dental and vision benefits for greater convenience.

Extensive network

Give your clients the freedom to choose the provider that's right for them. Our partnership with VSP provides access to the largest network of independent doctors, popular retailers like Walmart, Costco® Optical and more, and even an online shopping option.

Value-packed plans

We offer an array of plan designs, product features and funding options to fit your clients' needs. Not only do employees get a fully-covered WellVision Exam® (after copay), they also have access to a wide selection of eyewear at the lowest out of pocket cost.

Increased productivity

Vision exams are key to improving one's overall health since conditions from eyestrain to diabetes, high blood pressure and more can be detected during the exam.

Affordable, comprehensive and flexible plans with incredible customer service. And you thought it didn't get any better than our dental coverage.
